Abstract

This symposium showcases the latest HCI work from Asia and those focusing on incorporating Asian sociocultural factors in their design and implementation. In addition to circulating ideas and envisioning future research in human-computer interaction, this symposium aims to foster social networks among academics (researchers and students) and practitioners and grow a research community from Asia. © 2020 Owner/Author.

Author Keywords

Asia; Interaction design; Interaction techniques; Interactive systems; User interfaces

Index Keywords

Human engineering; Design and implementations, Hci researches, Research communities, Sociocultural factors; Human computer interaction

Publisher: Association for Computing Machinery
